

Meeting notes team meeting March 27, 2018

This was more a working meeting than a meeting to discuss things around the table. There were multiple people present during different timeslots this meeting, but at 13:00 when we had a short discussion with Feiko the following people were present: Daan, Zino, Tom, Andrei, Daan, Juanjo??? and Marc.

We discussed short how things were going with the project and the presentation. We had not yet decided who should do the presentation, but would discuss that during our weekly meeting the next day. The issue was discussed that we had only been working for a short time on implementing the design, because of problems with availability of the needed software. We would try to get some front end/back end integration working for the sprint due that day.
